

Bulk Bag Unloader

Engineered for rugged performance, it delivers reliable unloading of bulk materials in even the most demanding environments.

Features & Benefits

- Heavy Duty Mild Steel Construction
- Agitation Paddles for smooth flow of material
- Fast acting air controls
- 2-Ton Hoist and Trolley

Specifications

- Controls: 24 VDC / 120 VAC
- Electrical: 480 VAC, 3 Phase
- Compressed Air: Clean & Dry at 100 PSIG
- Air Process Connection: ½" FNPT

Options

- Stainless Steel Construction for corrosive or sanitary environments
- Hazardous Location Components for compliance in classified areas
- High Temperature Design for heat-sensitive applications
- Custom Frame Heights to suit facility layout
- Untie Box for safe and ergonomic bag opening

Optional Untie Box
